Spray gun for industry

The NITO LIGHT DUTY Spray Gun is a special light-duty gun for use in environments where it may be subjected to rough treatment. Ideal for workshops and production environments where the gun may be exposed to shocks and impacts. The NITO Light Duty Spray Gun is a high-quality product that never fails.

Application:

For flushing and cleaning jobs in industry and trades requiring a light-duty gun that can withstand shocks and is water-saving in use

For water with or without soap solution, e.g. for rinsing, washing, flushing and soap dispensing

Infinitely adjustable dispersion, from a concentrated jet to a 60° spray

Dispersion can be adjusted using a tool

Items shown represent only a small sample of our product assortment. See the full range on our website or contact NITO.
